EXPLANATION OF H. F. 70

This bill is a companion bill to the bill permitting cities and towns to anticipate receipts of the state aids used for highway construction. It would permit cities and towns to issue bonds in such amounts as would not increase the total indebtedness of any municipality to more than 5 per cent of the taxable value of the property within such municipality. It would affect only bonds issued for street construction by cities and towns, as under the present law all other public bonds of taxing districts are limited to a total of bonded indebtedness of 60 per cent of the assessed value of the property within the district.

This bill would require the placing on the tax list of a 100 per cent value of property assessed in addition to the listing of the assessed value which is 60 per cent of the actual value as provided by law.
